ORTUS TECHNOLOGY CO.,LTD.

1. Application

This Specification is applicable to 178 mm (7.0 inch) Blanview TFT-LCD monitor for non-military use.

◎ ORTUS TECHNOLOGY makes no warranty or assume no liability that use of this Product and/or any information
including drawings in this Specification by Purchaser is not infringing any patent or other intellectual
property rights owned by third parties, and ORTUS TECHNOLOGY shall not grant to Purchaser any right to use
any patent or other intellectual property rights owned by third parties. Since this Specification contains
ORTUS TECHNOLOGY's confidential information and copy right, Purchaser shall use them with high degree of
care to prevent any unauthorized use, disclosure, duplication, publication or dissemination of
ORTUS TECHNOLOGY'S confidential information and copy right.

◎ If Purchaser intends to use this Products for an application which requires higher level of reliability
and/or safety in functionality and/or accuracy such as transport equipment
(aircraft, train, automobile, etc.), disaster-prevention/security equipment or various safety
equipment, Purchaser shall consult ORTUS TECHNOLOGY on such use in advance.

◎ This Product shall not be used for application which requires extremely higher level of
reliability and/or safety such as aerospace equipment, telecommunication equipment for trunk lines,
control equipment for nuclear facilities or life-support medical equipment.

◎ It must be noted as an mechanical design manner, especial attention in housing design to prevent
arcuation/flexureor caused by stress to the LCD module shall be considered.

◎ ORTUS TECHNOLOGY assumes no liability for any damage resulting from misuse, abuse, and/or
miss-operation of the Product deviating from the operating conditions and precautions
described in the Specification.

◎ It shall be mutually conferred if nonconforming defect
which result from unspecified cause in this specification arises.

◎ If any issue arises as to information provided in this Specification or any other information,
ORTUS TECHNOLOGY and Purchaser shall discuss them in good faith and seek solution.

◎ ORTUS TECHNOLOGY assumes no liability for defects such as electrostatic discharge failure occurred
during peeling off the protective film or Purchaser's assembly process.

◎ This Product is compatible for RoHS directive.

Object substance	Maximum content [ppm]
Cadmium and its compound	100
Hexavalent Chromium Compound	1000
Lead & Lead compound	1000
Mercury & Mercury compound	1000
Polybrominated biphenyl series（PBB series）	1000
Polybrominated biphenyl ether series（PBDE series）	1000

ORTUS TECHNOLOGY CO.,LTD.

| SPECIFICATIONS № 17TLM036	Issue: Jun. 6, 2018

2. Outline Specifications

2.1 Features of the Product

- 7.0 inch diagonal display, 800 x RGB [H] x 480 [V] dots.
- 16.7 M colors (8-bit) / 262 K colors (6-bit).
- 3.3V voltage single power source.
- Timing generator [TG], Counter-electrode driving circuitry, Built-in power supply circuit.
- Long life & High bright white LED back-light.
- Blanview TFT-LCD, improved outdoor readability.

	Indoor		Outdoor	
	Readability	Power Efficiency (Battery Life)	Readability	Power Efficiency (Battery Life)
Transmissive	Good	Good	Fair	Poor
Transflective	Fair	Poor	Good	Good
Blanview	Good	Good	Good	Good

2.2 Display Method

Items	Specifications	Remarks
Display type	VA 16.7 M colors. / 262 K colors. Blanview, Normally black.	
Driving method	a-Si TFT Active matrix. Line-scanning, Non-interlace.	
Dot arrangement	RGB stripe arrangement.	Refer to "Dot arrangement"
Signal input method	8-bit / 6-bit LVDS interface	
Backlight type	Long life & High bright white LED.	
NTSC ratio	50%	

Dot arrangement (FPC cable placed down side)

ORTUS TECHNOLOGY CO.,LTD.

<Features of Blanview>
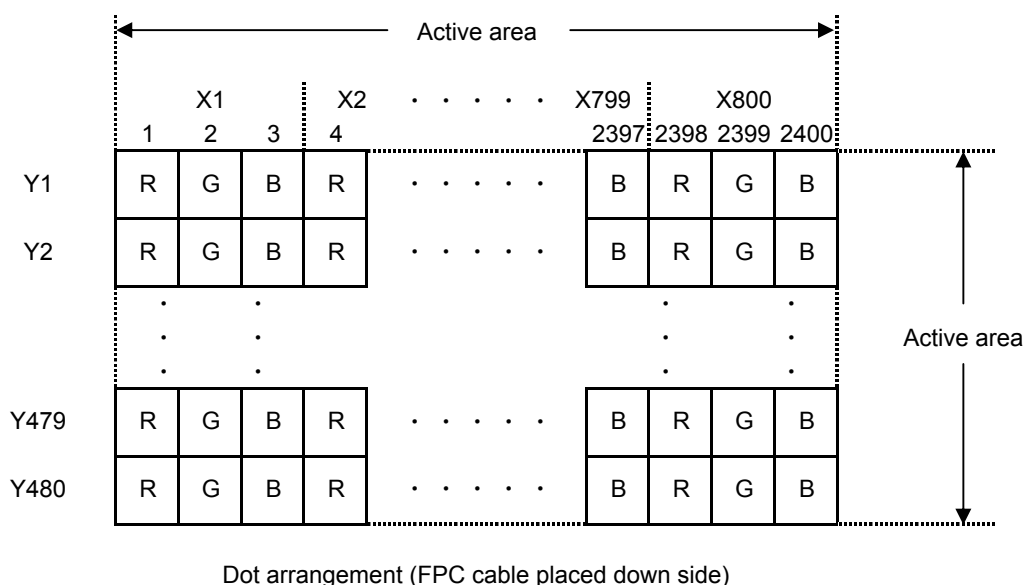

- Backlight power consumption required to assure visibility. (equivalent to 3.5"QVGA)

*Comparison with our conventional products

Transmissive

Backlight power consumption (mW)

800

Transmissivity is low, requiring a power-hungry backlight

600

Power-hungry backlight that competes effectively with outdoor light is required.

Transflective

400

Improved contrast, whiteness and outdoor visibility.

200

100

Blanview

0

| 10 | 100 | 1,000 | 10,000 | 100,000 |
| Moonlight | Warehouse | Office | Cloudy weather | Fine weather |

Surrounding illumination (lx)

- Contrast characteristics under 100,000lx. (same condition as direct sunlight.)

With better contrast (higher contrast ratio), Blanview TFT-LCD has the best outdoor readability in three different types of TFT-LCD.
Below chart shows contrast value against panel surface brightness. (Horizontal: Panel surface brightness/ Vertical: Contrast value) LCD panel has enough outdoor readability above our Standard line. (ORTUS TECHNOLOGY criteria)

3.3 Serial Label (S-LABEL)

1) Indication
    A section : Bar code
    B section : Combination of a character

A section →

B section →

(Label illustration showing bar code and the characters)
```
* * * * * 0 0 0 1 2 5
C O M 7 0 H 7 M 2 4 U L C
```
Details of B section
    Upper column: It indicates the least significant digit of manufacture year (1 digit),
           manufacture month with below alphabet (1letter), model code (4characters),
           serial number (6digits).

$$\underset{a}{\underline{*}} \quad \underset{b}{\underline{*}} \quad \underset{c}{\underline{****}} \quad \underset{d}{\underline{******}}$$

	Contents of display						
a	The least significant digit of manufacture year						
b	Manufacture month	Jan-A	Mar-C	May-E	Jul-G	Sep-I	Nov-K
		Feb-B	Apr-D	Jun-F	Aug-H	Oct-J	Dec-L
c	Model code	70VC (Made in Japan)					
		70WC (Made in Malaysia)					
d	Serial number						

    * Example of indication of Serial label (S-label)
    ・Made in Japan   ・Made in Malaysia

      8J70VC000125   8J70WC000125

means "manufactured in October 2018, 7" V type,   means "manufactured in October 2018, 7" W type,
C specifications, serial number 000125"   C specifications, serial number 000125"

    Lower column: Model (13characters)

2) Location of Serial Label (S-label)
    Refer to 3.2 "Outward Form".

3) Others
    Bar code readability is excluded from quality assurance coverage.

ORTUS TECHNOLOGY CO.,LTD.

4. Pin Assignment

No.	Symbol	Function	I/O
1	BLH	LED drive power source. (Anode side)	P
2	BLL2	LED drive power source . (Cathode side 2)	P
3	BLL1	LED drive power source . (Cathode side 1)	P
4	GND	Ground	P
5	VDD	Power supply input.	P
6	VDD	Power supply input.	P
7	TEST1	TEST input (Connect to VDD)	I
8	TEST2	TEST input (Connect to GND)	I
9	TEST3	TEST input (Connect to GND)	I
10	NC	No connection	-
11	UL/DR	Up & Left / Down & Right switching terminal (Low : DR , High or NC : UL)	I
12	IM	6 / 8 bit (based on VESA) switching terminal (Low : 6bit , High or NC : 8bit)	I
13	STBYB	Standby signal (Low:Standby operation,High:Normal operation)	I
14	GND	Ground	P
15	R0-	LVDS DATA0(-)	I
16	R0+	LVDS DATA0(+)	I

24	R2-	LVDS DATA2(-)	I
25	R2+	LVDS DATA2(+)	I
26	GND	Ground	P
27	R3-	LVDS DATA3(-)	I
28	R3+	LVDS DATA3(+)	I
29	GND	Ground	P
30	NC	No connection	-

- Recommended connector : IRISO ELECTRONICS   9699 series [IMSA-9699S-30A-GFN1]
- Please be sure to check a consistency between pin assignment in "3.2 Outward Form" and
  your connector pin assignment when designing your circuit.
  Inconsistency in input signal assignment may cause a malfunction.
- Since FPC cable has gold plated terminals, gilt finish contact shoe connector is recommended.

ORTUS TECHNOLOGY CO.,LTD.

	VL2	IL1=IL2=(20) mA	--	(21.9)	(25.0)	V	BLH - BLL2
Estimated Life of LED	LL	Ta=25 ℃ Note2 IL1=IL2=(20) mA	--	(100000)	--	hrs	

Note1: - Please control so that each current does not vary (IL1 = IL2).

Note2: - The lifetime of the LED is defined as a period till the brightness of the LED
  decreases to the half of its initial value.
  - This figure is given as a reference purpose only, and not as a guarantee.
  - This figure is estimated for an LED operating alone.
  As the performance of an LED may differ when assembled as a monitor
   together with a TFT panel due to different environmental temperature.
  - Estimated lifetime could vary on a different temperature and usually
 higher temperature could reduce the life significantly.

	Fall time	TOFF	(300) msec or less	(50) msec or less	
Display Quality			No noticeable display defect or ununiformity should be observed.		

ORTUS TECHNOLOGY CO.,LTD.

SPECIFICATIONS № 17TLM036	Issue: Jun. 6, 2018

10. Criteria of Judgment

/B\ 10.1 Defective Display and Screen Quality

Test Condition: Observed TFT-LCD monitor from front during operation
with the following conditions

Driving Signal   Raster Patter (RGB, white, black)
Signal condition   [Data]:00h, (TBD)h, FFh (3steps)
Observation distance   30 cm
Illuminance   200 to 350 lx
Backlight   IL1=IL2=(20.0)mA

30cm

90°

Defect item		Defect content		Criteria
Display Quality	Line defect	Black, white or color line, 3 or more neighboring defective dots		Not exists
	Dot defect	Uneven brightness on dot-by-dot base due to defective TFT or CF, or dust is counted as dot defect (brighter dot, darker dot) High bright dot: Visible through 2% ND filter at [Data]=00h Low bright dot: Visible through 5% ND filter at [Data]=00h Dark dot: Appear dark through white display at [Data]=(TBD)h		Refer to table 1
		Invisible through 5% ND filter at [Data]=00h		Acceptable
Screen Quality	Dirt	Uneven brightness (white stain, black stain etc)		Invisible through 5% ND filter at Black screen. Invisible through 1% ND filter at other screen.
	Foreign particle	Point-like	0.25mm< φ	N=0
			0.20mm< φ ≦0.25mm	N≦2
			φ ≦0.20mm	Acceptable
		Liner	3.0mm<length and 0.08mm<width	N=0
			length≦3.0mm or width≦0.08mm	Acceptable
	Others			Use boundary sample for judgment when necessary

φ(mm): Average diameter = (major axis + minor axis)/2
Permissible number: N

Table 1

Area	High bright dot	Low bright dot	Dark dot	Total	Criteria
A	0	2	2	3	Permissible distance between same color bright dots (includes neighboring dots): 3 mm or more
B	2	4	4	6	Permissible distance between same color high bright dots (includes neighboring dots): 5 mm or more
Total	2	4	4	7

SPECIFICATIONS № 17TLM036	Issue: Jun. 6, 2018

10.2 Screen and Other Appearance

Testing conditions

Observation distance	30cm
Illuminance	1200~2000 lx

Item		Criteria	Remark
Polarizer	Flaw Stain Bubble Dust Dent	Ignore invisible defect when the backlight is on.	Applicable area: Active area only (Refer to the section 3.2 "Outward form")
S-case		No functional defect occurs	
FPC cable		No functional defect occurs	

ORTUS TECHNOLOGY CO.,LTD.

B

11. Reliability Test

Test item		Test condition	number of failures /number of examinations
Durability test	High temperature storage	Ta=95°C (500)hrs	TBD
	Low temperature storage	Ta=-40°C (500)hrs	TBD
	High temperature & high humidity storage	Ta=60°C, RH=90% (500)hrs non condensing ※	TBD
	High temperature operation	Tp=85°C (500)hrs	TBD
	Low temperature operation	Tp=-30°C (500)hrs	TBD
	High temp & humid operation	Tp=40°C, RH=90% (500)hrs non condensing ※	TBD
	Thermal shock storage	-40←→95°C(30min/30min) (100)cycles	TBD
Mechanical environmental test	Electrostatic discharge test (Non operation)	Confirms to EIAJ ED-4701/300 C=200pF,R=0Ω,V=±200V Each 3 times of discharge on and power supply and other terminals.	TBD
	Surface discharge test (Non operation)	C=250pF, R=100Ω, V=±(TBD)kV Each 5 times of discharge in both polarities on the center of screen with the case grounded.	TBD
	FPC tension test	Pull the FPC with the force of 3N for 10 sec. in the direction - 90-degree to its original direction.	TBD
	FPC bend test	Pull the FPC with the force of 3N for 10 sec. in the direction -180-degree to its original direction. Reciprocate it 3 times.	TBD
	Vibration test	Total amplitude 1.5mm, f=10～55Hz, X,Y,Z directions for each 2 hours	TBD
	Impact test	Use ORTUS TECHNOLOGY original jig (see next page)and make an impact with peak acceleration of 1000m/s2 for 6 msec with half sine-curve at 3 times to each X, Y, Z directions in conformance with JIS C 60068-2-27-2011.	TBD
Packing test	Packing vibration-proof test	Acceleration of 19.6m/s^2 with frequency of 10→55→10Hz, X,Y, Zdirection for each 30 minutes	TBD
	Packing drop test	Drop from 75cm high. 1 time to each 6 surfaces, 3 edges, 1 corner	TBD

Note:Ta=ambient temperature   Tp=Panel temperature

※ The profile of high temperature/humidity storage and High Temperature/humidity operation
(Pure water of over 10MΩ·cm shall be used.）

Table2.Reliability Criteria
The parameters should be measured after leaving the monitor at the ordinary temperature for 24 hours or more after the test completion.

| item	Standard	Remarks
Display quality	No visible abnormality shall be seen. (Except for unevenness by Pol deterioration.)

13. Handling Instruction
    13.1 Cautions for Handling LCD panels

<div align="center">

⚠ **Caution**

</div>

(1)   Do not make an impact on the LCD panel glass because it may break and you may get injured from it.

(2)   If the glass breaks, do not touch it with bare hands.
       （Fragment of broken glass may stick you or you cut yourself on it.

(3)   If you get injured, receive adequate first aid and consult a medial doctor.

(4)   Do not let liquid crystal get into your mouth.
       （If the LCD panel glass breaks, try not let liquid crystal get into your mouth even toxic property
       of liquid crystal has not been confirmed.)

(5)   If liquid crystal adheres, rinse it out thoroughly.
       （If liquid crystal adheres to your cloth or skin, wipe it off with rubbing alcohol or wash
       it thoroughly with soap. If liquid crystal gets into eyes, rinse it with clean water
       for at least 15 minutes and consult an eye doctor.

(6)   If you scrap this products, follow a disposal standard of industrial waste
       that is legally valid in the community, country or territory where you reside.

(7)   Do not connect or disconnect this product while its application products is powered on.

(8)   Do not attempt to disassemble or modify this product as it is precision component.

(9)   If a part of soldering part has been exposed, and avoid contact (short-circuit)
       with a metallic part of the case etc. about FPC of this model, please.
       Please insulate it with the insulating tape etc. if necessary.
       The defective operation is caused, and there is a possibility to generation
       of heat and the ignition.

(10)   Since excess current protection circuit is not built in this TFT module, there is the possibility that
       LCD module or peripheral circuit become feverish and burned in case abnormal operation is generated.
       We recommend you to add excess current protection circuit to power supply.

(11)   The devices on the FPC are damageable to electrostatic discharge,
       because the terminals of the devices are exposed.
       Wear grounded wrist-straps and use electrostatic neutralization blowers to prevent static
       charge and discharge when handling the TFT monitors.
       Designate an appropriate operating area, and set equipment, tools, and machines properly
       when handling this product.

⚠   **Caution**   **This mark is used to indicate a precaution or an instruction which,**
                    if not correctly observed, may result in bodily injury, or material damages alone.

<div align="center">

ORTUS TECHNOLOGY CO.,LTD.

</div>

13.2 Precautions for Handling

1) Wear finger tips at incoming inspection and for handling the TFT monitors to keep
display quality and keep the working area clean.
Do not touch the surface of the monitor as it is easily scratched.

2) Wear grounded wrist-straps and use electrostatic neutralization blowers to prevent static charge and discharge
when handling the TFT monitors as the LED in this TFT monitors is damageable to electrostatic discharge.
Designate an appropriate operating area, and set equipment, tools, and machines properly
when handling this product.

3) Avoid strong mechanical shock including knocking, hitting or dropping to the TFT monitors
for protecting their glass parts. Do not use the TFT monitors that have been experienced
dropping or strong mechanical shock.

4) Do not use or storage the TFT monitors at high temperature and high humidity environment.
Particularly, never use or storage the TFT monitors at a location where condensation builds up.

5) Avoid using and storing TFT monitors at a location where they are exposed to direct
sunlight or ultraviolet rays to prevent the LCD panels from deterioration by ultraviolet rays.

6) Do not stain or damage the contacts of the FPC cable .
FPC cable needs to be inserted until it can reach to the end of connector slot.
During insertion, make sure to keep the cable in a horizontal position to avoid an oblique insertion.
Otherwise, it may cause poor contact or deteriorate reliability of the FPC cable.

7) Do not bend or pull the FPC cable or carry the TFT monitor by holding the FPC cable.
Especially, it will cause mechanical damage or critical defect if FPC is pull up or bent up to short of display.
8) Peel off the protective film on the TFT monitors during mounting process.
Refer to the section 13.5 on how to peel off the protective film.
We are not responsible for electrostatic discharge failures or other defects
occur when peeling off the protective film.

13.3 Precautions for Operation

1) Since this TFT monitors are not equipped with light shielding for the driver IC,
do not expose the driver IC to strong lights during operation as it may cause functional failures.

2) In case of powering up or powering off this LCD module,
be sure to comply the sequence as instructed in this specification.

3) Do not plug in or out the FPC cable while power supply is switch on.
Plug the FPC cable in and out while power supply is switched off.

4) Do not operate the TFT monitors in the strong magnetic field. It may break the TFT monitors.

5) Do not display a fixed image on the screen for a long time.
Use a screen-saver or other measures to avoid a fixed image displayed on the screen for a long time.
Otherwise, it may cause burn-in image on the screen due the characteristics of liquid crystal.

ORTUS TECHNOLOGY CO.,LTD.

13.4 Storage Condition for Shipping Cartons

Storage environment
- ・ Temperature   0 to 40°C
- ・ Humidity   60%RH or less
                       No-condensing occurs under low temperature with high humidity condition.
- ・ Atmosphere   No poisonous gas that can erode electronic components and/or
                       wiring materials should be detected.
- ・ Time period   1 year
- ・ Unpacking   To prevent damages caused by static electricity, anti-static precautionary measures
                       (e.g. earthing, anti-static mat) should be implemented.
                       After unpack, keep product in the appropriate condition,
                       otherwise bubble seal of Protective film may be printed on Polarizer.
- ・ Maximum piling up 7 cartons

*Conditions to storage after unpacking

Storage environment
- ・ Temperature   0 to 40°C
- ・ Humidity   60%RH or less
                       No-condensing occurs under low temperature with high humidity condition.
- ・ Atmosphere   No poisonous gas that can erode electronic components and/or
                       wiring materials should be detected.
- ・ Time period   1 year (Shelf life)
- ・ Others   Keep/ store away from direct sunlight
                       Storage goods on original tray made by ORTUS.

ORTUS TECHNOLOGY CO.,LTD.

13.5 Precautions for Peeling off the Protective film

 The followings work environment and work method are recommended to prevent the TFT monitors from
static damage or adhesion of dust when peeling off the protective films.

 A) Work Environment
  a) Humidity: 50 to 70 %RH, Temperature15 to 27˚C
  b) Operators should wear conductive shoes, conductive clothes, conductive finger tips and grounded wrist-straps.
   Use an electrostatic neutralization blower.
   Anti-static treatment should be implemented to work area's floor.
  c) Use a room shielded against outside dust with sticky floor mat laid at the entrance to eliminate dirt.

 B) Work Method
  The following procedures should taken to prevent the driver ICs from charging and discharging.
  a) Use an electrostatic neutralization blower to blow air on the TFT monitors to
   its lower left when FPC is placed at the bottom.
   Optimize direction of the blowing air and the distance between the TFT monitors
   and the electrostatic neutralization blower.
  b) Put an adhesive tape (Scotch tape, etc) at the lower left corner area
   of the protective film to prevent scratch on surface of TFT monitors.
  c) Peel off the adhesive tape slowly (spending more than 2 secs to complete)
   by pulling it to opposite direction.
Blower wind direction (Set an ion blower with its adequate conditions.)

13.6 Warranty

 ORTUS is only liable to defective goods which is stored and used under the condition complying
 with this specifications and returned within 1 (one) year.
 Warranty caused by manufacturing defect shall be conducted by replacement of goods or refundment at unit price.

ORTUS TECHNOLOGY CO.,LTD.

APPENDIX

B Reference Method for Measuring Optical Characteristics and Performance

1. Measurement Condition (Backlight ON)

|	
Measuring instruments:	CS2000（KONICA MINOLTA）, LCD7200(OTSUKA ELECTRONICS),EZcontrast160D（ELDIM）
Driving condition:	Refer to the section "Optical Characteristics"
Measured temperature:	25°C unless specified
Measurement system:	See the chart below. The luminance meter is placed on the normal line of measurement system.
Measurement point:	At the center of the screen unless otherwise specified

Dark box at constant temperature

TFT monitor   Luminance meter

LCD7200: 290mm
CS2000: 350mm

Measurement is made after 30 minutes of lighting of the backlight.

Measurement point: At the center point of the screen
Brightness distribution: 9 points shown in the following drawing.

<Landscape model>

Dimensional ratio of active area

Backlight   IL1=IL2=(20.0)mA

ORTUS TECHNOLOGY CO.,LTD.

Measurement Condition (Contrast ratio Backlight OFF only)

Measuring instruments:	LCD7200(OTSUKA ELECTRONICS),Ring Light(40,000 lx,φ58)
Driving condition:	Refer to the section "Optical Characteristics"
Measured temperature:	25°C unless specified
Measurement system:	See the chart below.
Measurement point:	At the center of the screen.

2. Test Method

Notice	Item	Test method	Measuring instrument	Remark
1	Response time	Measure output signal waves with a brightness meter when the raster or window pattern is changed over from white to black and from black to white Black　　　　White　　　　Black White brightness 100% 90% 10% 0% Black brightness　　TON　　　TOFF	LCD7200	Black display [Data]=00h White display [Data]=FFh TON 　Rise time TOFF 　Fall time
2	Contrast ratio	Measure maximum luminance Y1([Data]=FFh) and minimum luminance Y2([Data]=00h) at the center of the screen by displaying raster or window pattern. Then calculate the ratio between these two values. 　　Contrast ratio = Y1/Y2 　　Diameter of measuring point: 1mmφ(CS2000) 　　Diameter of measuring point: 3mmφ(LCD7200)	CS2000 LCD7200	Backlight ON Backlight OFF
3	Viewing angle Horizontalθ Verticalφ	Move the luminance meter from right to left and up and down and determine the angles where contrast ratio is 10.	EZcontrast160D	
4	White chromaticity	Measure chromaticity coordinates x and y of CIE1931 colorimetric system at [Data] = FFh 　Color matching function: 2°view	CS2000	
5	Burn-in	Visually check burn-in image on the screen after 2 hours of "window display" ([Data]=00h/FFh).		At optimized VCOMDC
6	Center brightness	Measure the brightness at the center of the screen.	CS2000	
7	Brightness distribution	(Brightness distribution) = 100 x B/A % A : max. brightness of the 9 points B : min. brightness of the 9 points	CS2000	

ORTUS TECHNOLOGY CO.,LTD.
